Rarebooksclub.com, United States, 2012. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book ***** Print on Demand *****.This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1833 Excerpt: .by the caterpillars produced from 1 oz of eggs, which is upwards of 1200 lbs. A single silk-worm, as we before mentioned, consumes within thirty days about 60,000 times its primitive weight. When we take these facts into consideration, we need not be surprised at the extensive ravages committed by other caterpillars, many of which are much larger than the silk-worm, and all of them produced in broods of considerable numbers. Mr Stephens, in his valuable catalogue of British insects, a work of Count Dandolo s Art of rearing Silk-Wornw, p. 322-24, Kng. Transl. VOL. VI. 17 very extraordinary accuracy, enumerates nearly 2000 species of native moths and butterflies; and as the females of these are for the most part very prolific, we have little reason to be surprised at the occasional extent of their depredations. The 2000 species just mentioned are, besides, not more than...
