To download **Space and Time, in Contemporary Physics, an Introduction to the Theory of Gravitation (Classic Reprint) (Paperback)** PDF, make sure you refer to the link listed below and download the file or have accessibility to other information that are relevant to SPACE AND TIME, IN CONTEMPORARY PHYSICS, AN INTRODUCTION TO THE THEORY OF GRAVITATION (CLASSIC REPRINT) (PAPERBACK) ebook.

Forgotten Books, United States, 2015. Paperback. Book Condition: New. 229 x 152 mm. Language: English . Brand New Book ***** Print on Demand *****.Excerpt from Space and Time, in Contemporary Physics, an Introduction to the Theory of Gravitation Probably no physical theory in recent times has given rise to more discussion amongst philosophers than the principle of relativity. One school of thought agrees that physicists may well be led to recast their notions of space and time in the light of experimental results. Another school, however, is of opinion that these questions are no concern of the physicists, who should make their theories fit the philosophers conceptions of these fundamental units. The theory of relativity consists of two parts, the old special theory, and the more recent general theory. The main philosophic achievement of the special theory of relativity is probably the recognition that the description of an event, which is admittedly only perfect if both the space and time co-ordinates are specified, will vary according to the relative motion of the observer; that it is impossible to say, for instance, whether the interval separating two events is so many centimetres and so many seconds, but that this interval may be split up into length and time in different ways, which depend upon the observer who is describing it. The reasons which force this conclusion upon the physicist may be made clear by considering what will be the impression of two observers passing one another who send out a flash of light at the moment at which they are close together. The light spreads out in a spherical shell, and it might seem obvious, since the observers are moving relatively to one another, that they cannot both remain at the centre of this shell.
